It's time for smart living

# Elegancy meets technology

Many people look for smart electrical devices to better control their homes; however, they might not find a solution which is both well-engineered and fashionably designed. TIS presents Mars Series to show you how elegant technology can be.

Mars Panel Series are available in 3 product ranges; Mars 10 Gang+ AC, Mars 8 Gang, and Mars 4 Gang. These nice-curved series are programmed to control, moods, motors, climate and lighting and are installable to any back box. These series are designed in 7 colors and perfectly fit into your decoration scheme.

Mars 10 Gang+ AC is a 10 button panel with a stylish touch screen, 1" OLED, and attractive iconic buttons. This device has an internal thermostat; it reads the room temperature, so that you can manage the cooling and heating systems more efficiently.

Another practical feature of this solution is that its OLED can display pre-defined messages. For example, if you are in work up to your ears and forget to close the balcony window for a while, Mars 10 Gang+ AC notifies you with a message on its OLED. Also, if there is water leakage somewhere in the house, it will be the first to know and you will be informed at once.

8 Gang and 4 Gang Panels are simpler interfaces from the Mars Series and have an in-built IR receiving functionary to be controlled by remote control. This capability is of great value to elderly people since they get to enjoy a combination of classic and latest technology.

Grandparents deserve to enjoy their relaxing times unworriedly. Mars 8Gang or 4Gang + a remote control might be a valuable gift for your grandparents. It is very easy to work with, and brings major comfort to their lives.

Seeing the smile on grandparents' face  
**is worth it.**
