

GET BIG SOUND

FROM A SMALL DEVICE

TIS WiFi Amplifier

Nowadays, with the rise of minimalist interior designs, the most popular devices are those that offer the greatest functionality packed into the smallest size. Responding to customers' needs, TIS has now designed an intelligent amplifier to better enhance your audio experience—an audio streamer with simplified complexities and efficient performance.

This device flexibly adapts to your listening routines and provides sound quality you'll love. You can connect it to your WiFi network and play tunes from popular music sources like Spotify, Amazon Music, TIDAL, etc.

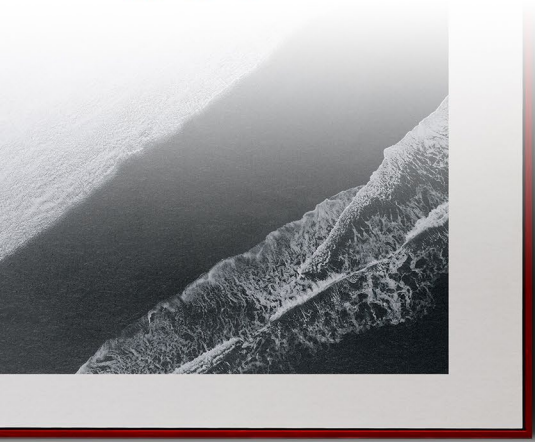

And you don't need to worry if your phone's sound isn't loud enough to hear your favorite podcast while you're cooking. Simply use your TIS amplifier for high-end stereo sound and the best transmission quality.

The inputs and outputs of this amplifier are configurable and let you enjoy a wide range of connection options so that you can choose the one that best suits the hour. Stream sound using Ethernet cables connected to the device's terminal ports or from your TIS app dashboard. You can also connect to this device via USB and start grooving.

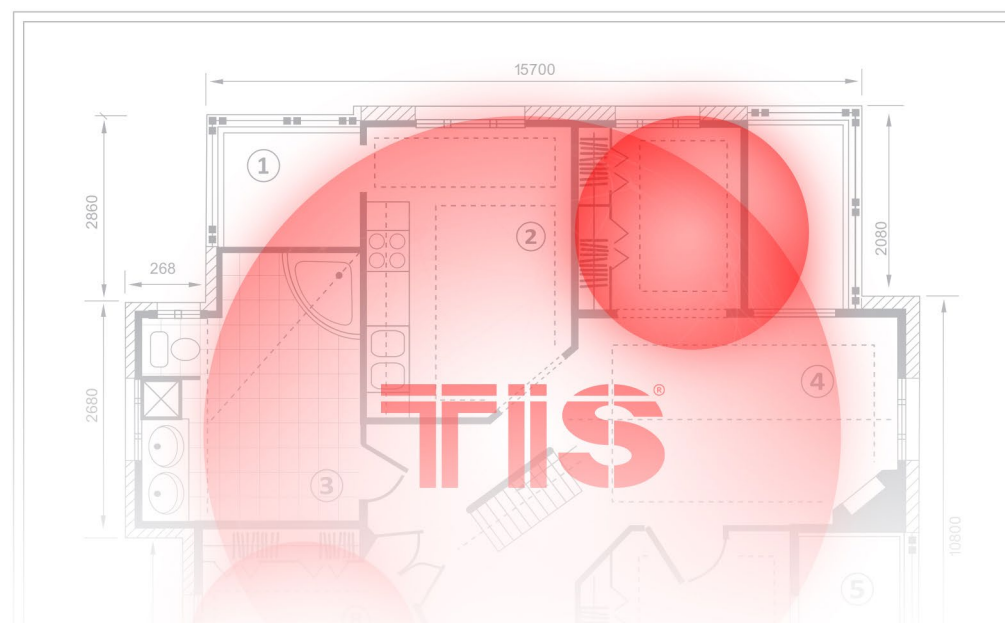

Or, how about having TIS bring your favorite audiobook to life with a thrilling sound? You can link your smartphone to your smart amplifier via Bluetooth and enjoy listening to an interesting story while lying in bed.

Kids will love the atmospheric moods this amplifier creates with game consoles, tablets, or PCs. They can experience their games as if they are actually in them; the clear and punchy performance of the TIS amplifier makes everything real.

We feel committed to creating designs based on your needs, and this time, we are going to thrill you with a device that produces full-range sound in every room.
