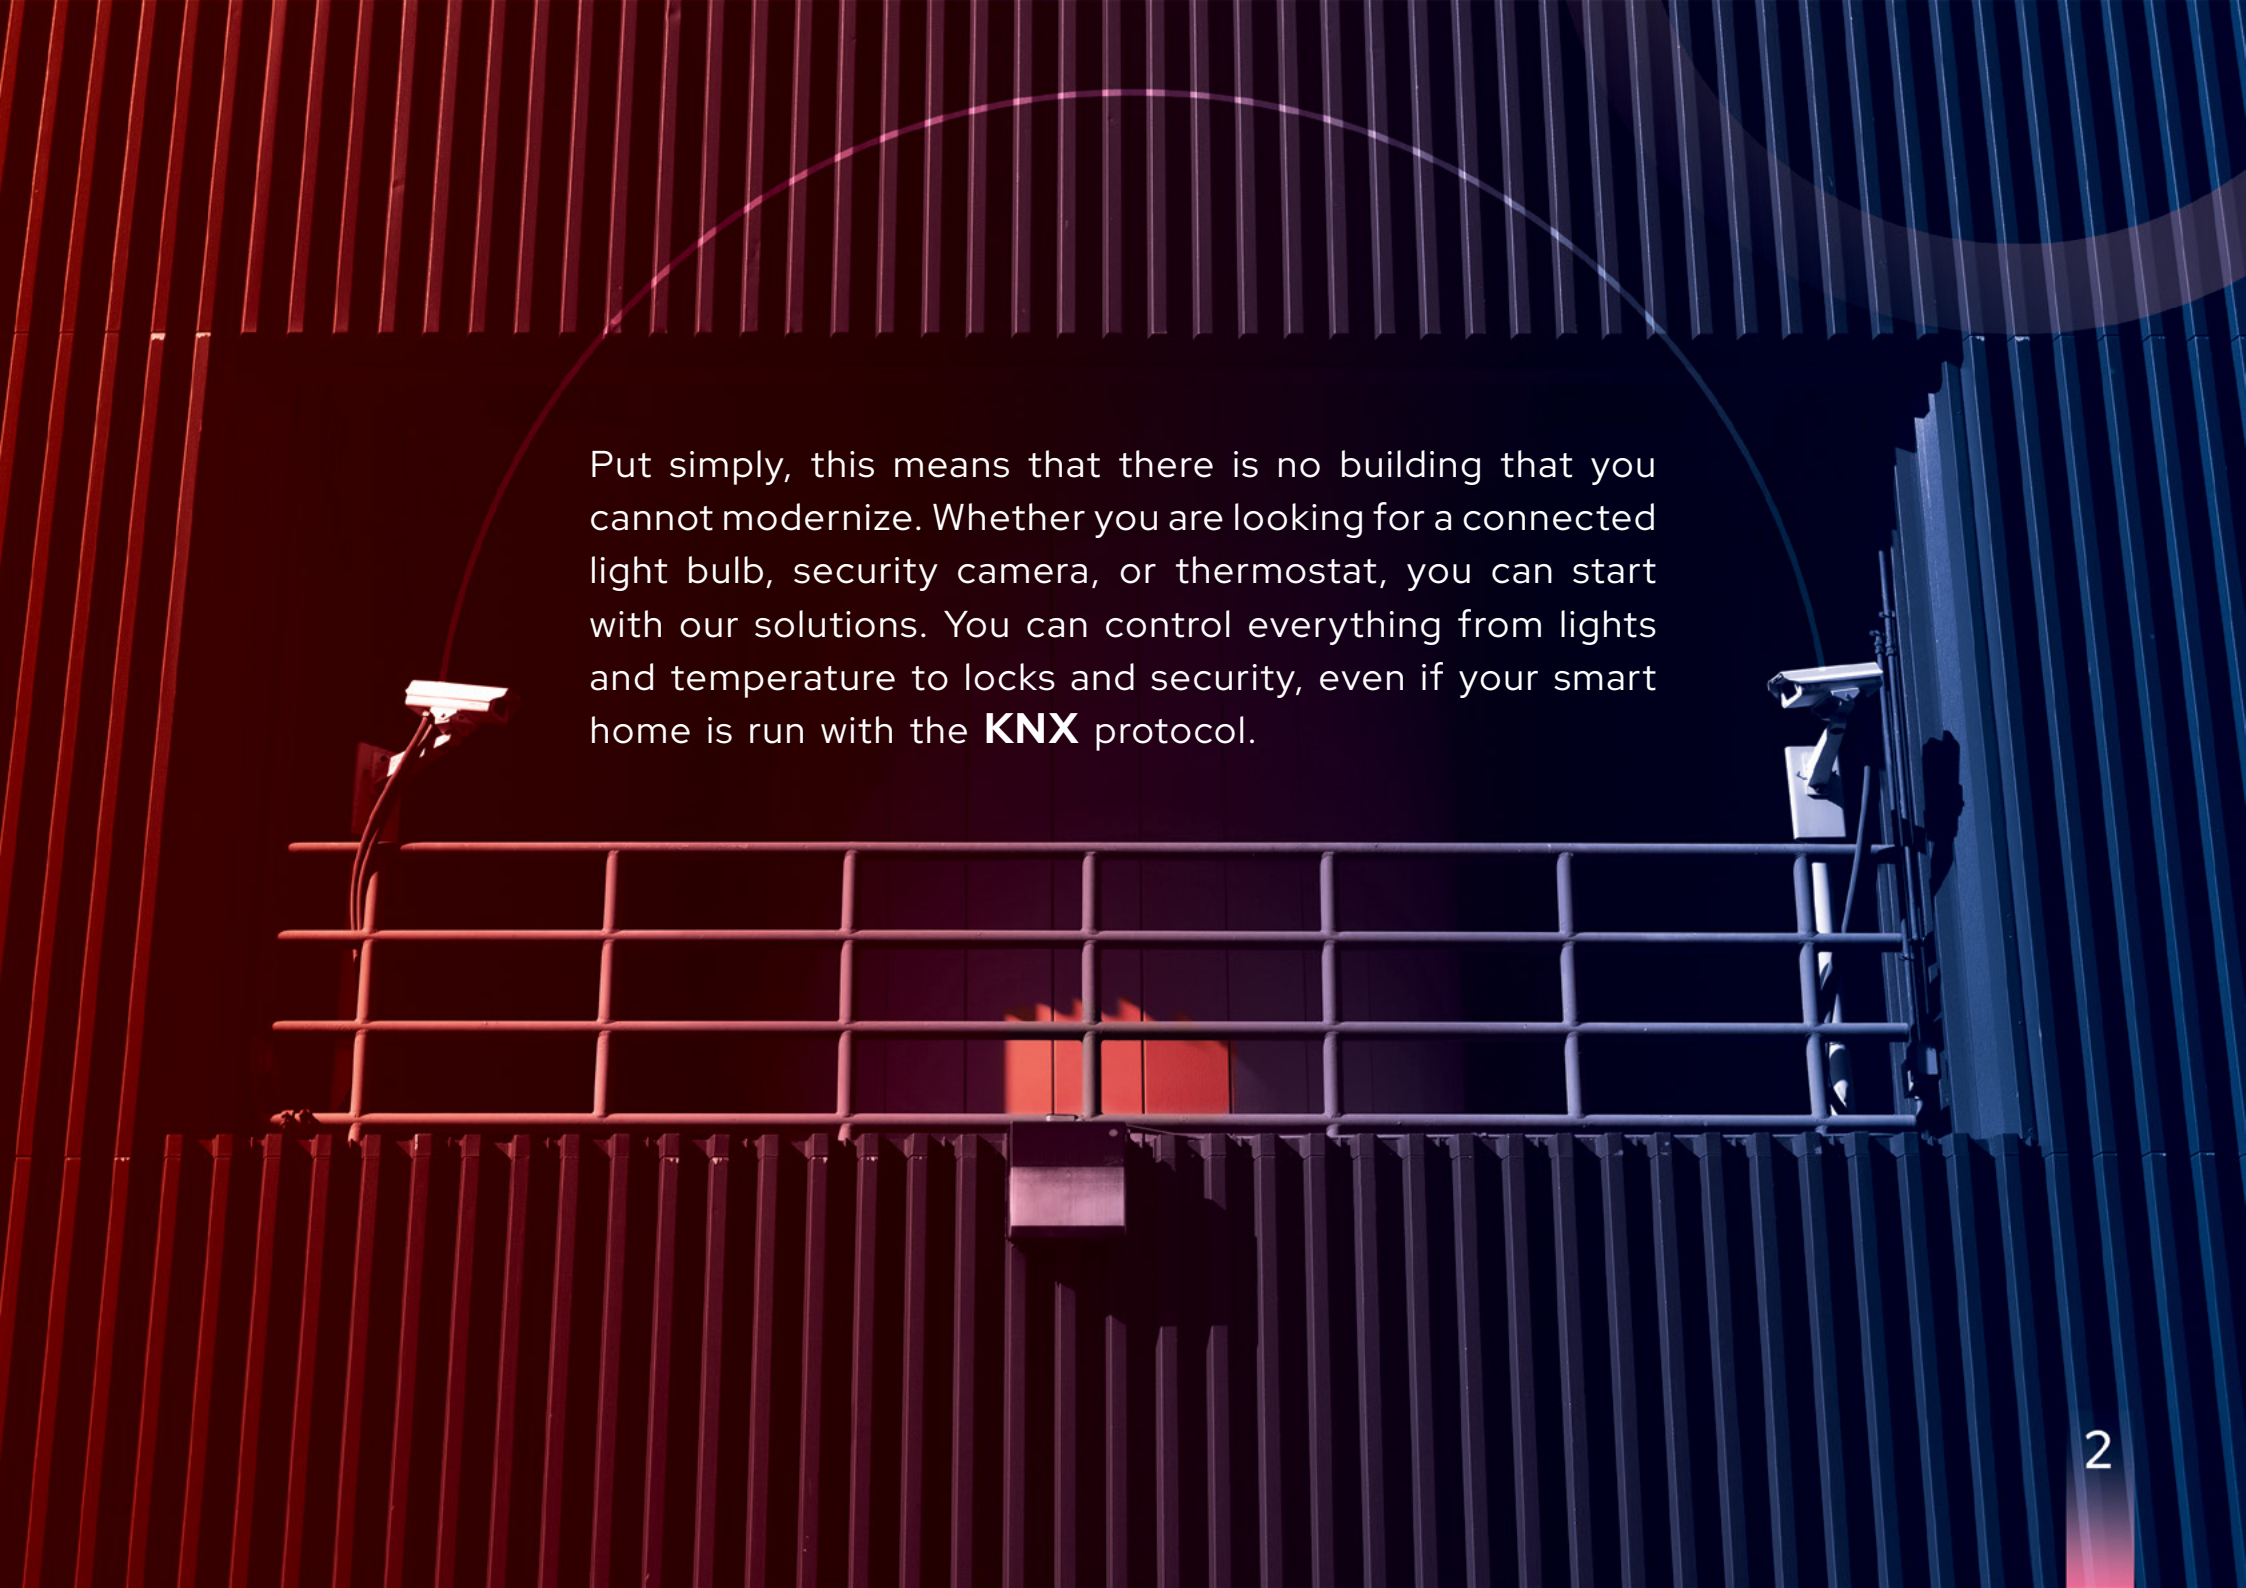
CONTROL EVERYTHING

KNX GATEWAY

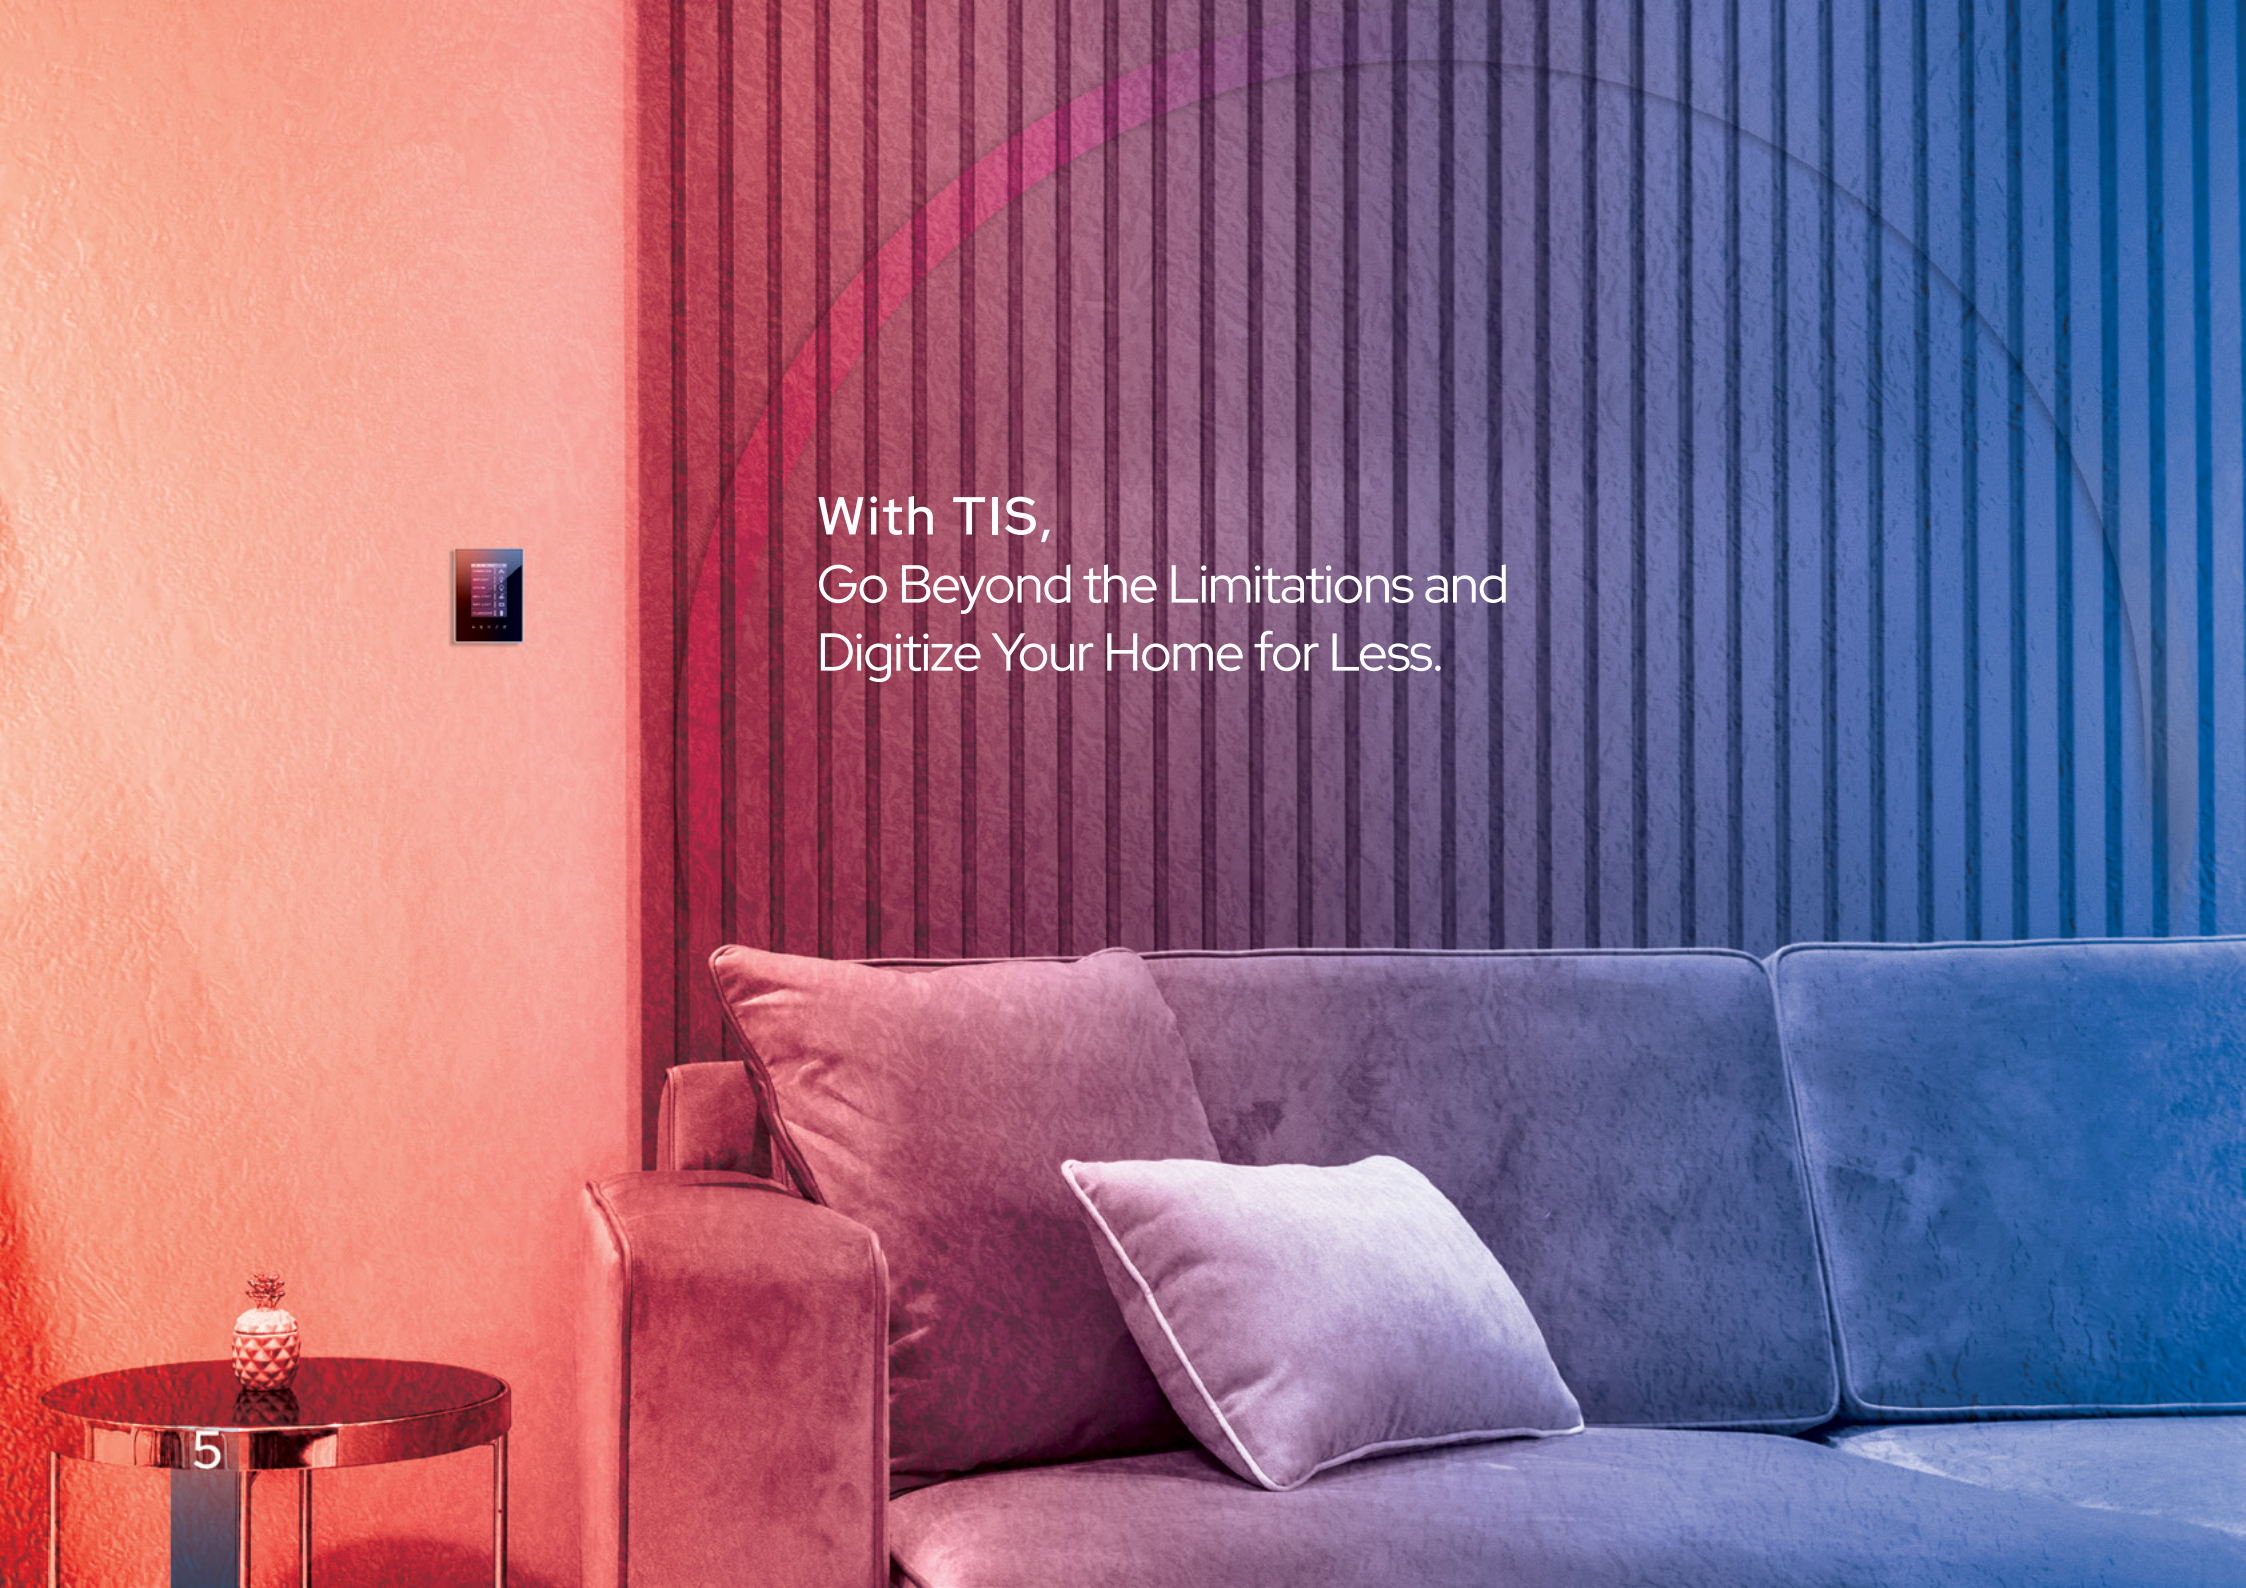
The number of smart home brands is constantly growing, but not all smart home devices are as adaptable as they should be. In the search for efficient designs that fit all project types, TIS has collaborated with some famous protocols. **TIS's BUS-KNX** Converter is a product that links the **TIS BUS** network to Europe's popular **KNX** network for maximum convenience.



Put simply, this means that there is no building that you cannot modernize. Whether you are looking for a connected light bulb, security camera, or thermostat, you can start with our solutions. You can control everything from lights and temperature to locks and security, even if your smart home is run with the **KNX** protocol.

We raise your home›s IQ; even if your shutters are **KNX,** they can still be automatically closed at noon with a TIS protocol. You do not have to buy several solutions or accrue high expenses to make your home smart. With **TIS BUS-KNX,** all lights, AC, wall switches, curtains, locks, gates, motors, and more work harmoniously to bring you the utmost convenience.

However, the **TIS BUS-KNX** converter is about more than just convenience. It also helps you save on heating and energy costs and create better routines. Therefore, if you are shopping for the holidays or buying a housewarming present, remember that the **TIS BUS-KNX** module also makes a fantastic gift for your loved ones.



With TIS,
Go Beyond the Limitations and
Digitize Your Home for Less.
