It's time for smart living

# SEE BEYOND THE HORIZON

Missing a visitor or having to rearrange your schedule while waiting for visitors are both annoying. The same goes for when you are in the back yard barbequing and someone knocks; you either cannot hear the bell ring, or you are too busy to leave the grill unattended. The TIS Smart Home Company is here to offer you our WIFI Door Bell—a new solution that allows you to use your cell phone to avoid all of these problems.

This WIFI video intercom is installed outside your entrance door and does not require an indoor panel. Instead of an indoor panel, the video image and intercom is always available on your cell phone. That's right. Using your phone, you are able to see who's at the door, talk to visitors, and even open the door if needed.

Installation and configuration are very easy. These can be done without a technician or programmer; you can take care of everything yourself.

Like other AIR products, this device is equipped with WIFI and connects directly to the Internet and the TIS server. This allows you to answer the doorbell even when you are away. Just add the TIS chime to your phone and get notified any time there is someone at your door—even if your phone is off.

It is also configurable with RF bell types, so even when there is no Internet access or your battery dies, the WIFI Door Bell lets you know you have a visitor.

Have a surprise birthday gift on the way from an old friend? You won't miss it. This smart intercom can be linked to any number of cell phones. This way, if the mailman comes and you are not around, it can still be taken care of.

The WIFI Door Bell is your home's smart guard. It's an upgrade to your property's security system, and its high-quality motion sensor informs you of any kind of movement. You can prevent possible break-ins by answering the intercom or making immediate contact with any familiar person who is around.

Moreover, this doorbell gives you a vivid 24/7 image of your front door area. Any time you're wondering what is going on outside your home, make use of this device's high-quality camera lens and night vision.

This smart solution, which is available in silver, is so elegantly designed that it smoothly glitters next to your beautiful luxury property.

TIS's innovative technology aims at making your life more enjoyable and convenient.

**With the WIFI Door Bell meet your visitors from anywhere and always feel at home. You earned it.**
